Ascend TECHNOLOGIES

Flexibile & scalable infrastructure is critical. We make it possible.

CUSTOM MONITORING & MANAGEMENT

Ascend can monitor all cloud & hybrid infrastructure components, utilization, and services, or a combination built to meet your needs. Plus monitoring & management of public cloud infrastructure (AWS, Azure, and more), enabling your IT team to focus on key initiatives.

SECURE & HIGHLY AVAILABLE SYSTEMS

Our deep technical experts resolve incidents, plan maintenance, perform upgrades, and help with strategy and architecture — driving productivity and eliminating downtime.
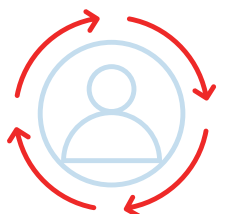

24x7x365 COVERAGE

Event notification, tracking, response, and break-fix infrastructure support, plus execution of established ITIL processes to ensure consistent results.

CONTINUOUS ENHANCEMENTS

Proactive maintenance and regular infrastructure assessments to continuously evolve your environment and meet your growing business needs.

SATISFIED & PRODUCTIVE END USERS

With 99.97% environment uptime across all clients and device types — both in the cloud and on-premise — our best-of-breed tools and services ensure a reliable, high-quality experience.
