SECURE EMAIL BENEFITS

THREAT PREVENTION

Powerful anti-spam and anti-malware are complemented by advanced techniques like outbreak protection, impersonation detection and other technologies to stop unwanted bulk email, phishing, business email compromise, and targeted attacks.

DATA PROTECTION

Robust data loss prevention, identity-based email encryption, and archiving help prevent the inadvertent loss of sensitive information and maintain compliance with your industry's regulations.

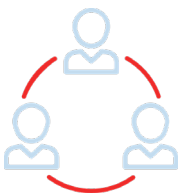

SECURITY INTEGRATION

Add layered security to your existing email platform with support for other security integrations, including Infogressive Perimeter Security. Our security fabric promotes proactive security by sharing Indicators of Compromise (IoCs) across your security solutions.

HIGH PERFORMANCE

Easily scale to handle more than 1.5 million messages per hour with full anti-spam and anti-malware filtering. Our solution can support organizations of all sizes.

EXPERT MANAGEMENT

Gain a team of expert security engineers. Our 24x7 Security Operations Center (SOC) is on your side to monitor and manage the secure email platform and meet the needs of your organization.

Email security is hard. **Trust the experts.**
