

# XDR

Extend your threat prevention, detection, & response capabilities.

## THREAT HUNTING

Detect threats across the full IT ecosystem, including endpoint, network, & cloud

Traditional anti-virus solutions only catch about 43% of attacks

43%

The average business network generates

# MILLIONS

of logs each day, any of which could contain indicators of compromise

## SITUATIONAL AWARENESS

Activity timelines & context provide the full picture of an ongoing attack

77%

of today's successful attacks utilize fileless techniques

## INTELLIGENT RESPONSE

Expert guidance from our 24x7 SOC helps reduce the severity & scope of an attack

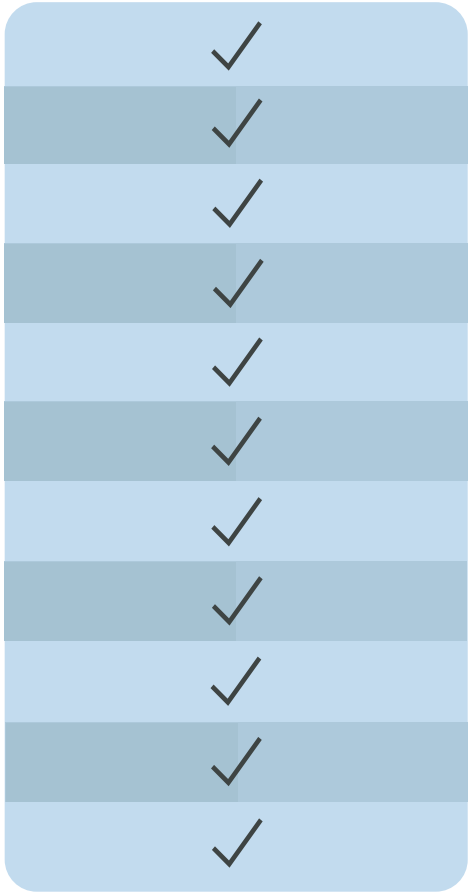

Are you confident you can detect an attack before it's **too late**?

Get the **right data** in the **right hands**  
— right when you need it most.

## XDR SERVICE BUNDLE

- Real-time monitoring
- Proactive security alerts
- Pre-execution malware prevention
- File & endpoint quarantine
- Memory exploitation detection
- Script & application control
- Complete log management
- Cross-network data correlation
- AI-driven threat identification
- 24x7 SOC monitoring
- Instant endpoint remediation controls
