Penetration Testing

Let us test your defenses before someone else does

Penetration Testing is designed to proactively identify and address security vulnerabilities within your IT infrastructure. Our expert security team conducts thorough assessments, simulating real-world attacks to uncover weaknesses before they can be exploited by malicious actors. We provide detailed reports with prioritized remediation strategies and offer continuous monitoring and retesting to ensure sustained security improvements. By partnering with us, you'll enhance your long-term security posture, comply with industry standards, and protect your critical assets against evolving cyber threats.

Services You Gain

Comprehensive Testing & Reporting
Our security team conducts comprehensive penetration tests, evaluating network security, system configurations, access controls, and social engineering vulnerabilities, and then delivers detailed reports with findings and discusses remediation strategies.

Customized Attack Scenarios
Our team can customize attack scenarios tailored to your specific environment and threat landscape, ensuring that testing focuses on the most relevant and high-risk areas of your network and applications.

Expert Remediation Support
We offer expert support to help your IT team implement necessary security measures and fixes, working closely with your staff to ensure remediation efforts are effective and sustainable, enhancing your long-term security posture.

The Ascend Advantage
Experts You Can Trust

Award-Winning Team
Team Ascend's renowned experts are some of the best in the industry. Ascend consistently ranks among the top MSPs in the country, earning positions on award charts such as Channel Future's top 501 MSPs, the CRN MSP 500 & Elite 150, and Inc. 5000.

ITIL-Based Processes
Our unwavering mission is to maximize efficiency by making the onboarding, implementation, and rollout journey seamless and enjoyable. Leveraging the ITIL framework, we bridge the gap between security and compliance to enhance overall effectiveness.

Zero Trust Security Approach
Adopting a "trust no one" strategy safeguards your company information from the inside out. We'll implement continuous authorization, strict access controls and ongoing monitoring for your ultimate protection.
